

## Murphy Came to Visit, but PC/Accelerator Beat Murphy!

Object Conversion Hours	
PC/Accelerator	ESTOBJCVN
1.2	24

The graph above displays the object translation time on a large, 4-way processor. PC/Accelerator translated 220,000 objects in 1,400 libraries in 1 hour 10 minutes at Perot Systems in Texas. ESTOBJCVN calculated 24 hours. Murphy caused problems with: RSTLIB, Message Queues, Power Supplies, Hardware, Electric Department, Transformers, Fire Department and Even the Evacuation of a building with 30 Systems going down because of electric problems.

Keith Drawdy's from Perot Systems First Comment was, "PC/Accelerator was the ONLY Bright Spot ALL Weekend!" Purchased 9 copies with 21 more systems left!
